A while back I was in a public hall which had an open piano for anybody to play. A quite young child was pounding away on a tune with a melodic base line in the left hand and repeated triplets in the right. Several people thought the child was brilliant. I am not a pianist, just a trumpet player with very minor piano playing capabilities, but two thoughts came to mind immediately: First, it was not that complex, so the child should probably not be compared to Mozart just yet. Second, I naively thought I might be able to concoct something better than that. This is the result - a piece a casual pianist with modest abilities could enjoy playing for friends who might not object too violently if forced to listen.
