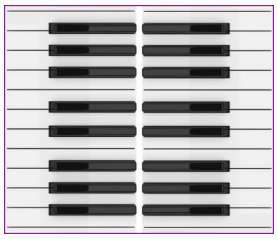
# 3bardelay

## A Curious Duet
## for two keyboards

When keyboards face each other,
every key gives a different note from the one opposite.
All except the D key in the middle.

To make the duet:

**A**



**B**

Firstly,
A begins to play
the original melody.

After a 3 bar delay, B begins to copy, from the start,
exactly the pattern of movements made by A
...giving an entirely new second melody
to complete the duet.
